

MOEN^W MONITORING AND PROTECTING YOUR HOME FROM WATER DAMAGE

Flo[®] Smart Water Monitor and Shutoff

The Flo[®] Smart Water Monitor and Shutoff is a game-changing leak detection and water monitoring device that detects leaks anywhere in the home. This device can automatically turn off the water to the home if a leak or risk is detected, with the ability to start and stop water flow from your smartphone. It also provides real-time information on water usage in your home.

MOEN^W SMART WATER NETWORK

Welcome to the home's first Smart Water Network – an ecosystem of smart water products integrated by the Moen Smart Water App (available 2023). As part of this network, Smart Water Security products monitor for water leaks, collect water usage data, shut off the water supply when necessary and more.

- SMART WATER SECURITY
- Flo Smart Water Monitor and Shutoff
- Smart Leak Detector
- Smart Sump Pump Monitor
- SMART FAUCET
- SMART SHOWER

WHY?

Moen exists to help people discover, improve and customize their relationship with water.

What is the Flo® Smart Water Monitor and Shutoff?

Installed on the home's main water supply line, the Flo® Smart Water Monitor and Shutoff continuously monitors for leaks, as well as water pressure, flow rate and area temperatures in the home, and notifies you of any abnormalities in real time through the Moen® Smart Water App.

Why do homeowners need one?

Visibility and Reassurance: Many homeowners may not know when they have a leak in their waterlines. Upon installation of the Flo Smart Water Monitor and Shutoff, 60% of homeowners immediately discover a leak they didn't know about.

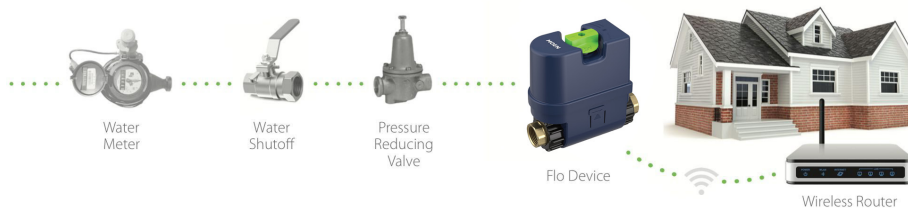

Proactive Protection: The Flo Smart Water Monitor and Shutoff mitigates the risk of water damage by giving homeowners the opportunity to proactively address water leaks in the home before there is significant damage.

How does it work?

With proprietary MicroLeak™ technology, the Flo Smart Water Monitor and Shutoff runs daily Health Tests to help detect leaks, including very small leaks or leaks behind walls or other hidden areas. It can also detect if a fixture has been left on or if temperatures are near freezing.

Through the Moen Smart Water App, you can access this information in real time and opt to shut off the main water supply remotely. You can also set the device to turn off the water automatically if you do not respond to notifications.

The Flo Smart Water Monitor and Shutoff also monitors daily water usage, enabling you to compare water usage to historical patterns and set and monitor conservation goals.

In the Box:

- Flo Smart Water Monitor and Shutoff
- Spare O-rings (x2)
- NPT threaded brass tailpieces (x2)
- Installation spacer
- 10-foot power supply
- Hex key

KEY BENEFITS

24/7 Protection – The Flo Smart Water Monitor and Shutoff monitors for water leaks around the clock and alerts you to any abnormalities, including freezing temperatures or a fixture that has been left on.

Remote Shutoff – Through the Moen Smart Water App, you can shut off your water remotely. You can also elect to have your water shut off automatically if you do not respond to notifications.

Water Usage Monitoring – Through the Moen Smart Water App, you can monitor water usage in your home, compare it to historical usage patterns, and set and monitor conservation goals.

Extra Insurance – For \$5 USD per month and no long-term contract, you can subscribe to FloProtect™, which covers your water damage deductible up to \$5,000 USD. It also extends the one-year guarantee on your Flo Smart Water Monitor and Shutoff by four more years, for a total of five years.

Customizable Notifications – The Moen Smart Water App allows you to customize the way you are notified in case of a leak or other water event – by text, phone call, email and/or through the app itself.
